MRS L.M Kazembe Malawi Revenue Authority P/Bag 247 Blantyre

WORK EXPERIENCE

Money Q Fintech Solutions Limited   **Blantyre Malawi**
Software developer / Mobile app developer   *April 2022 – Present*

- Designed and developed our mobile application which includes developing the overall architecture and functionalities of the mobile application.
- Conducted extensive testing and debugging to ensure the mobile app meets quality standards and resolved issues.
- Built our app's user interfaces that are visually appealing, easy to navigate, and intuitive to use.
- Deployed our mobile application to different app stores such as Apple Store and Google Play Store and ensured that the applications run smoothly.

M-technologies Limited   **Blantyre Malawi**
Full-stack software developer   *January 2020 - April 2022*

- Refactored our SAAS Applications code which improved our applications performance by 30% and also reduced our applications downtime.
- Developed different APIs that were then integrated with different service providers such as Banks and Mobile operators to provide easy payments to our application users.
- Collaborated with different team members such as developers, designers, project managers, and stakeholders to ensure that our applications are developed and delivered on time and to a high standard.
- Spearheaded the implementation and use of Git and GitHub which improved collaboration between developers.

Relevant Projects

File-vert   **December 2022**
React, TailwindCss, Graphql, Node.js, Express.js, MongoDB
- File-vert is a subscription-based web-based application that allows users to convert different files to different formats based on their subscription type.
- Developed the web application to help users easily convert their files.
- Integrated Zamzar.com APIs that help in converting the files.
- Designed a RESTful backend server that enables files to be persisted for a while.

Whatsapp clone   **December 2022**
React, TailwindCss, Redux, Node.js, Express.js, MongoDB, AWS
- Whatsapp clone is an online chat application that provides both private and group chat.
- Developed the web application to provide real-time chatting among users.
- Integrated with AWS S3 buckets to provide file storage.
- Designed a RESTful backend server that enables user and group chats to be persisted.
